## Backend / Infrastructure Engineer | Distributed Systems, Reliability, Networking

Marlboro, NJ | 347-739-4731 | phoem@mac.com | github.com/phoem

*Selected public repositories are available. The most significant engineering repositories are private; access is available upon request.*

### SUMMARY

---

Backend and infrastructure engineer specializing in distributed systems, high-performance networking, reliability, automation, and large-scale production operations. Built and operated infrastructure spanning thousands of servers and developed custom runtime, traffic-analysis, DDoS-mitigation, authentication, telemetry, deployment, kernel, and HTTP/CDN software.

### TECHNICAL SKILLS

---

- **Languages:** C, C++, Go, Python, C#, Objective-C, PHP, Perl, JavaScript, Node.js, Shell, Visual Basic
- **Systems:** FreeBSD, Linux, kernel modules, system calls, operating systems, kqueue, sendfile(), GDB, TCP/IP, non-blocking I/O
- **Networking/Security:** HTTP, DNS, CDN architecture, socket programming, DDoS detection/mitigation, packet capture, libpcap, IPFW, authentication, telemetry
- **Cloud/DevOps:** Azure DevOps, Docker, Kubernetes, Terraform, CI/CD, security scanning, deployment automation
- **Databases/Web:** MySQL, MultiValue/Universe, OAuth/OAuth2, SMTP OAuth, React, jQuery, PHP, web services

### SELECTED TECHNICAL HIGHLIGHTS

---

- Built backend and infrastructure systems supporting approximately 3,000-4,000 servers, 10 CDN locations, and more than 65 Gbps of peak traffic.
- Designed and deployed a custom non-blocking HTTP/CDN runtime across approximately 200 FreeBSD servers.
- Used kqueue, sendfile(), SF\_NODISKIO, O\_NONBLOCK, TCP\_NODELAY, TCP\_NOPUSH, accept filters, and specialized I/O workers for scalable event-driven operation.
- Automated deployment, provisioning, monitoring, telemetry, authentication, and infrastructure management across production environments.
- Built packet and DNS analysis systems and DDoS defenses used during attacks involving up to 750,000 compromised or misconfigured hosts.

### SELECTED SYSTEMS PROJECTS

---

- **PrimeHTTPD:** Architected and implemented a high-performance, non-blocking, kqueue-based HTTP/CDN server in C for FreeBSD. Used sendfile(), SF\_NODISKIO, TCP\_NODELAY, TCP\_NOPUSH, O\_NONBLOCK, accept\_filter\_http, persistent connections, and dedicated I/O workers.
- **VirtualDir:** Designed and developed a FreeBSD kernel module that intercepted filesystem-related syscalls and transparently remapped paths from configuration, enabling shared physical layouts without chroot jails; included the vdcli runtime management tool.
- **PrimeDump:** Built a libpcap-based real-time traffic analyzer decoding Ethernet, IP, TCP, UDP, and ICMPv6 with ncurses views and IPFW integration.
- **PrimeDNSTop:** Built a DNS traffic monitor parsing UDP/53 and RFC 1035 queries to detect recursion attacks and rank source and domain activity.
- **TAFOS:** Developed an educational x86 operating-system kernel in C and assembly with a custom MBR bootloader, protected mode, IDT, heap allocator, port I/O, VGA output, and GDB support.

### PROFESSIONAL EXPERIENCE

---

#### Advantive - Senior Development Specialist

*Remote / Tampa Bay, FL | July 2022 - Present*

- Implemented Azure DevOps, Docker, Kubernetes, Terraform, CI/CD, and security-scanning workflows across engineering teams.
- Served as a member of the Architecture Team, collaborating with fellow architects and the architecture lead to make technical decisions, define engineering standards, guide platform direction, and develop shared libraries, documentation, and AI-assisted engineering workflows.

#### DDI Systems - Senior Development Specialist

*Manalapan, NJ | November 2021 - July 2022*

- Modernized legacy VB.NET components in C# and integrated Microsoft Office 365 SMTP OAuth for secure customer-facing workflows.

#### ISPrime LLC - CEO

*Weehawken, NJ | April 2018 - January 2020*

- Led datacenter modernization, operational restructuring, and improvements to internally developed monitoring, security, and infrastructure platforms.

#### DDI Systems - Computer Programmer

*Manalapan, NJ | April 2017 - April 2018*

- Built ERP integrations and automated order, catalog, image, SDS, SFTP, SellerCloud, Essendant, and MultiValue/Universe data workflows.

#### Too Much Media LLC - Computer Programmer

*Morganville, NJ | January 2016 - April 2017*

- Developed real-time browser chat integrated with ticketing systems and implemented OAuth 2.0 authorization for protected sites.

#### MFCXY, Inc. - Computer Programmer

*Chicago, IL | December 2014 - September 2015*

- Developed backend and Windows client features and middleware for cross-platform database migration.

## AJPM, LLC - Programmer / Owner

New Jersey / Remote | November 2012 - December 2013

- Built automated purchasing, inventory, repair, resale, and financial workflow software.

## ISPrime Inc. - CIO / Partner

Weehawken, NJ | March 2001 - December 2014

### Infrastructure Leadership

- Architected and operated hosting and CDN infrastructure spanning approximately 3,000-4,000 servers, 10 locations, multiple datacenters, and more than 65 Gbps of peak traffic.

### Systems Software Engineering

- Designed and built PrimeHTTPD, a high-performance, non-blocking, kqueue-based HTTP/CDN server in C for FreeBSD; deployed it across approximately 200 servers and supported more than 150,000 concurrent connections.
- Leveraged sendfile(), SF\_NODISKIO, TCP\_NODELAY, TCP\_NOPUSH, O\_NONBLOCK, accept\_filter\_http, persistent connections, and dedicated I/O workers to keep disk operations from blocking the networking event loop.
- Developed production FreeBSD kernel modules including VirtualDir, KeepClean, and StatCache.

### Security and Networking

- Built DDoS detection and mitigation systems, packet and DNS analysis tools, monitoring, telemetry, authentication, deployment, and security software used across production infrastructure.

## FatWallet.com - Systems Administrator

Wisconsin / Remote | December 2000 - June 2001

- Rebuilt production infrastructure to resolve performance and stability issues without customer-facing downtime and created automated availability and health alerting.

## EDUCATION

**Brookdale Community College** - Computer Science coursework; left during first semester to pursue ISPrime full-time during rapid company growth.
