

JORDAN NEWMAN

Senior Developer | Platform Integrations, Security, Architecture

Marlboro, NJ | 347-739-4731 | phoem@mac.com | github.com/phoem

Selected public repositories are available. The most significant engineering repositories are private; access is available upon request.

SUMMARY

Senior software engineer and hands-on architect with more than 20 years of experience building backend platforms, secure integrations, reusable infrastructure, and production systems. Delivered complex integrations across organizational boundaries spanning OAuth-based authentication, browser and ticketing workflows, ERP and third-party supplier platforms, cross-database migration, shared libraries, deployment automation, and high-scale internet infrastructure. Combines end-to-end technical ownership with Architecture Team collaboration, clear documentation, security-focused design, and practical judgment about when to create reusable platform capabilities. Current work includes AI-assisted engineering workflows alongside Azure DevOps, Kubernetes, Terraform, CI/CD, and secure software-delivery standards.

TECHNICAL SKILLS

- **Backend and Integration:** APIs, web services, enterprise integrations, shared libraries, platform components, OAuth/OAuth2, Microsoft 365 SMTP OAuth, SFTP, data-import pipelines
- **Languages:** C, C++, Go, Python, C#, Objective-C, PHP, Perl, JavaScript, Node.js, Shell, Visual Basic
- **Security and Identity:** Authentication, authorization, OAuth 2.0, security scanning, DDoS mitigation, IPFW, telemetry, secure delivery practices
- **Platform and DevOps:** Azure DevOps, Docker, Kubernetes, Terraform, CI/CD, deployment automation, technical documentation, AI-assisted engineering workflows
- **Systems and Networking:** Linux, FreeBSD, HTTP, DNS, TCP/IP, sockets, kqueue, sendfile(), non-blocking I/O, distributed infrastructure
- **Databases and Web:** MySQL, MultiValue/Universe, React, jQuery, PHP, browser-based applications

SELECTED INTEGRATION AND PLATFORM HIGHLIGHTS

- Collaborate on Advantive Architecture Team decisions, engineering standards, platform direction, reusable libraries, and technical documentation.
- Implemented secure software-delivery capabilities across engineering teams using Azure DevOps, Kubernetes, Docker, Terraform, CI/CD, and automated security scanning.
- Integrated Microsoft Office 365 SMTP OAuth into customer-facing enterprise software while modernizing deprecated VB.NET components in C#.
- Delivered complex integrations across vendor and platform boundaries, including SellerCloud, Essendant, supplier SFTP feeds, product catalogs, images, safety data, orders, and MultiValue/Universe data.
- Developed real-time browser chat integrated with ticketing workflows and implemented OAuth 2.0 authorization for protected customer sites.
- Built middleware for cross-platform database migration and backend/client integrations supporting operational continuity.
- Held end-to-end architecture and operational responsibility for reusable authentication, telemetry, deployment, monitoring, security, and infrastructure-management systems supporting approximately 3,000-4,000 servers across 10 locations.

PROFESSIONAL EXPERIENCE

Advantive - Senior Development Specialist

Remote / Tampa Bay, FL | July 2022 - Present

- Demonstrate end-to-end ownership by driving architecture work forward amid evolving requirements, collaborating with architects and the architecture lead to evaluate needs, define standards, and guide platform direction.
- Develop reusable libraries, technical documentation, and AI-assisted engineering workflows that improve consistency and developer productivity.
- Implement Azure DevOps, Docker, Kubernetes, Terraform, CI/CD, and security-scanning workflows for reliable, secure software delivery.

DDI Systems - Senior Development Specialist

Manalapan, NJ | November 2021 - July 2022

- Modernized legacy VB.NET components in C# and integrated Microsoft Office 365 SMTP OAuth into customer-facing software, replacing deprecated implementations with a secure authentication model.

ISPrime LLC - CEO

Weehawken, NJ | April 2018 - January 2020

- Led datacenter modernization, operational restructuring, and improvements to internally developed monitoring, security, and infrastructure platforms.

DDI Systems - Computer Programmer

Manalapan, NJ | April 2017 - April 2018

- Designed and implemented ERP integrations and automated data workflows for SellerCloud, Essendant, supplier SFTP systems, orders, catalogs, images, safety data, and MultiValue/Universe databases.

Too Much Media LLC - Computer Programmer

Morganville, NJ | January 2016 - April 2017

- Developed real-time browser chat integrated with ticketing systems and implemented OAuth 2.0 authorization for protected sites.

MFCXY, Inc. - Computer Programmer

Chicago, IL | December 2014 - September 2015

- Developed backend services and Windows client integrations and built middleware for cross-platform database migration.

AJPM, LLC - Programmer / Owner

New Jersey / Remote | November 2012 - December 2013

- Built integrated purchasing, inventory, repair, resale, and financial workflow software for day-to-day business operations.

ISPrime Inc. - CIO / Partner

Weehawken, NJ | March 2001 - December 2014

Platform Architecture and Operations

- Architected and operated hosting and CDN infrastructure spanning approximately 3,000-4,000 servers, 10 locations, multiple datacenters, and more than 65 Gbps of peak traffic.
- Built reusable monitoring, telemetry, authentication, deployment, security, and infrastructure-management systems used across production environments.

Backend, Security, and Systems Engineering

- Designed and built PrimeHTTPD, a high-performance HTTP/CDN platform in C for FreeBSD; deployed it across approximately 200 servers and supported more than 150,000 concurrent connections.
- Developed DDoS mitigation, packet and DNS analysis, operational tooling, and production FreeBSD kernel modules supporting secure, reliable service delivery.

FatWallet.com - Systems Administrator

Wisconsin / Remote | December 2000 - June 2001

- Rebuilt production infrastructure to resolve performance and stability issues without customer-facing downtime and created automated availability and health alerting.

EDUCATION

Brookdale Community College - Computer Science coursework; left during first semester to pursue ISPrime full-time during rapid company growth.
